

WEEE & RoHS Workshop (2 days)

Course Summary

This Workshop is aimed at Manufacturers supplying electrical and electronic equipment who need to meet the compliance requirements for impending WEEE (Waste from Electrical Electronic Equipment) Directive 2002/96/EC as from the 13th August 2005 and the RoHS (Restrictive use of Hazardous Substances) Directive 2002/95/EC from July 2006.

This workshop will fuel much debate, as some of the legislation remains unclear. Questions will be encouraged at every stage to ensure that delegates have a comprehensive understanding of how this legislation effects their own company.

Benefits

- Establishing Companies own status towards WEEE & RoHS
- Confidence in knowing how to meet WEEE & RoHS legal obligations
- Knowing where to get further help

Content

Introduction

- Background to WEEE & RoHS
